University of Tartu (ESTONIA)

Introduction

- The role of ICT has increased rapidly.
- The lack of the labour with good ICT knowledge and skills (Hüsing et al., 2013).
- Dropout in ICT related curricula is a worldwide problem. Average dropout in Europe is 19% (Hüsing et al., 2013).

Introduction

- Many ICT students start working during studies.
- The importance of bachelor's degree (in USA) has grown and employees with higher education earn more (Sum et al., 2007).
- Motivation is important in finishing studies (Bruinsma, 2004).

Methods

- September 2013
- 517 first year ICT students
- From 8 different curricula and 3 main universities in Estonia where ICT is taught
- Questionnaire which contained multiple choice and open ended questions
- ICT students perception

Qualitative content analysis

- A coding schema of categories was inductively developed based on the data of every open-ended question.
- Two raters specified the categories until it was possible to reach 80% accuracy.
- Two researchers carried out the data analysis.
- 10% randomly selected answers were independently analysed to test for inter-rater reliability (Cohen's Kappa > 0.8).
