

# .KODALITY

## BRIGHTEST DEVELOPERS WANTED

### Hello guys and girls!

Soon you will have to make an important choice of the way in which to go and develop. You can go to a state structure, to a large private IT company or to a small developing IT company. In the state structure you will have stability, but a small position and you will not be able to develop. In a large IT company, you will have stability and an opportunity to gradually develop, but for a long time there will not be an opportunity to make decisions and strict internal rules will stymie you.

In a small IT company you will develop rapidly. You can try yourself in many roles, you will have the opportunity to communicate with the client, you will be able to make decisions and become one of the leaders of a project, i.e. you can develop not only your technical skills along with industry mastodons, but your personal skills as well. In short, the floor is yours - show what you can and we will boost it!

**Kodality** is a young and ambitious IT company, consisting of professionals with unique knowledge in various business and technology sectors, with an average experience of more than 10 years in IT. Members of the team participated in the development of healthcare, financial and ticketing systems for both hospitals/enterprises and states, not only in Estonia.

We are growing and are looking for young, smart and hardworking guys and girls for our company. If you know Java, you're not scared when you hear the word Javascript/Angular, you understand how to work with databases and you dream of applying your knowledge in practice, then you are probably the one who we need.

You have a chance to work with a team whose main value is creating quality code and providing the customer with solutions that will have a real impact on their business. You will understand the development process from the inside out, and after 1.5-2 years you will feel like a Developer with a capital letter.

If you are interested in us and you want to try your hand at it or just chat with us, then let us know about yourself at [careers@kodality.com](mailto:careers@kodality.com).
