

UNIVERSITY OF TARTU

Elliptical Constructions in Estonian UD Treebank

Kadri Muischnek and Liisi Torga
University of Tartu

Universal Dependencies (UD)

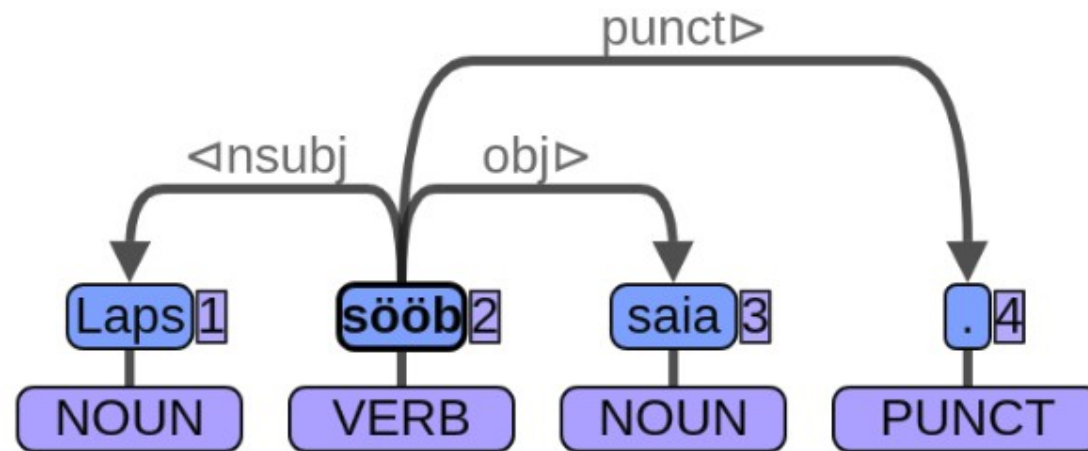

UNIVERSITY OF TARTU

- <http://universaldependencies.org>
- initiative aimed at developing cross-linguistically consistent treebank annotation
- latest version (2.3) - more than 100 treebanks in over 70 languages
- ongoing project: annotation guidelines and treebank annotations are changing from version to version
- Estonian UD treebank - ca 400,000 tokens; over 30,000 sentences

Syntactic annotation in UD framework UNIVERSITY OF TARTU

represents typed dependency relations between words

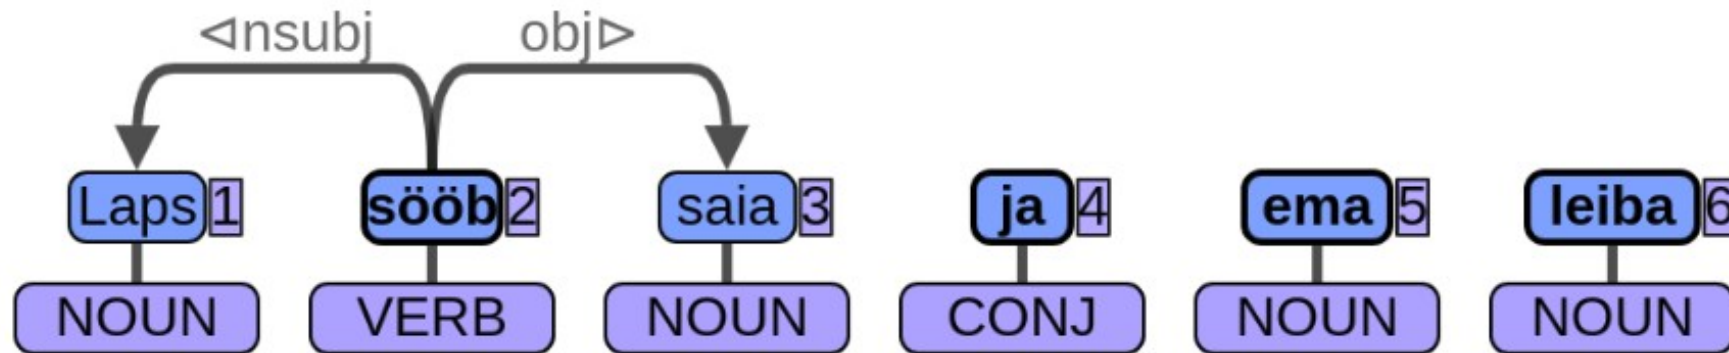

Laps sööb saia, lit. 'Child eats bun'

Predicate verb ellipsis: which word should govern the clause?

Laps sööb saia ja ema leiba. Lit. 'Child eats bun and mother bread'

Our poster

UNIVERSITY OF TARTU

- types of predicate verb ellipsis in Estonian UD treebank
- their automatic detection and re-annotation
