

Three Possibilities

- C: What is the difference between the two, color and red?
- D: There are three possibilities.
- C: It follows that there are not three possibilities. Posit something which is both.
- D: I here is something. The subject, the color of a ruby.
- C: It follows that the subject, the color of a ruby, is a color.
- D: I accept it.
- C: The subject, the color of a ruby, is a color—
- D: Because of being suitable as a hue.
- C: It follows that whatever is suitable as a hue is necessarily a color.
- D: I accept it.
- C: It follows that the subject, the color of a ruby, is red.
- D: I accept it.
- C: The subject, the color of a ruby, is red—
- D: Because of being an instance of red.
- C: It follows that whatever is an instance of red is necessarily red.
- D: I accept it
- C: Now which is necessarily the other? Which is not necessarily the other? Posit something which is one but not the other.
- D: Whatever is red is necessarily a color. Whatever is a color is not necessarily red. The subject, the color of a white religious conch.
- C: It follows that the subject, the color of a white religious conch, is a color.
- D: I accept it.
- C: The subject, the color of a white religious conch, is a color—
- D: Because of being white.
- C: It follows that whatever is white is necessarily a color.
- D: I accept it.
- C: It follows that the subject, the color of a white religious conch, is not red.
- D: I accept it.
- C: The subject, the color of a white religious conch, is not red—
- D: Because of being white.
- C: It follows that whatever is white is necessarily not red.
- D: I accept it.
- C: Now posit something which is neither.
- D: There is something. The subject, a round form.
- C: It follows that the subject, a round form, is not a color.
- D: I accept it.
- C: The subject, a round form, is not a color—

- D: Because of being a shape.
- C: It follows that whatever is a shape is necessarily not a color.
- D: I accept it.
- C: It follows that the subject, a round form, is not red.
- D: I accept it.
- C: The subject, a round form, is not red—
- D: Because of not being a color.
- C: It follows that whatever is not a color is necessarily not red.
- D: I accept it
