

Questions to solve the initial situation of the Delay scenario

Here is what you have to do next:

In the box below, please write all the problems you found in this situation (number them and if possible, please use a different row for each problem).

Now think about the company's mission, your PLT's main task and the latest information you saw, heard or read in the paper. Then decide how well the tactical solutions offered below will work in this situation. You can only use each number once, which means that you need to match each tactical solution to a number.

The scale is: 1 (very poor), 2 (poor), 3 (rather poor), 4 (rather good), 5 (good) or 6 (very good).

_____ I make CONTACTREP to A90. Then I command A13 to close the minefield and SECURE route AUDI IOT support retiring of A11 and A12. Then I command VP1, A11, A12 and A14 to RETIRE position PANDA IOT occupy position ZEBRA. (v11)

_____ I make CONTACTREP to A90. Then I move to the location of VP1 IOT get a better overview of ENY action. (v12)

_____ I make CONTACTREP to A90. Then I call for IDF IOT create smoke screen in the crossroad in grids 628986. Then I command VP1 to leave the position and move to the RES area. Then I command A13 to be prepared to close the minefield. Then I command A13 to send half a squad to the hump in grids 625985 IOT SECURE path towards north east. (v13)

_____ I make CONTACTREP to A90. Then I command FCT to be prepared to call IDF to the crossroad in grids 628 986 IOT blind ENY. Then I command A14 to be prepared to deal with WIA-s in RES area. Then I command A13 to close the minefield. (v14)

_____ I make CONTACTREP to A90 and inform him about ENY closing to my positions; in addition, I ask who is dealing with ENY that broke through in A20 positions. Then I inform all my call signs about situation in A20 positions in TAGULA. Then I command VP1 and A11 to be prepared to RETIRE on my order. Then I command a13 to close the minefield. (v15)

_____ I make CONTACTREP to A90. Then I inform all my call signs about the situation in A20 positions in TAGULA. Then I command VP1 to remain in the positions until my further orders.
