

Instruction for students

Choose two countries: one that you would like to live in and one that you would not like to live in. Write their names below.

A country our group would like to live in	A country our group would not like to live in

Imagine that you have to emigrate to one of these countries as your country has been destroyed. You have only one piece of luggage and about 5000 EUR.

Try to come up with a strategy in both cases answering following questions (we hope it might be helpful):

- How I will start?
- Where I will search for support?
- Will I have to learn the language of the host country?
- When I will be able to communicate smoothly?
- Will I go to work or to school?
- How will I search for a suitable accommodation? (remember about limited budget that you have and calculate all the aspects connected with everyday life, pay attention to different social, educational, taxes system)
- Will I make friends with people from my home country, or with people from the host country?
- May I enjoy cuisine, music, or customs of the host country?
- Would I consider applying for the citizenship of the hoist country?

When you are ready present your strategy to the class.

Then, after all presentations think and discuss with all in the class: What are the differences within my own strategy (or group strategy) in the case of the two countries?

SETTLING DOWN IN
(a country our group would like to live in)

SETTLING DOWN IN
(a country our group wouldn't like to live in)
