

## Instruction for students

Fill in the table below. In the first column write, in what way the selected initiatives are fulfilling (or not) the requirements of the contact hypothesis? In the third column describe the examples of actions that prove it.

	<b>Initiative</b>	<b>Contact hypothesis requirement</b>	<b>Way of fulfilling it within the project</b>
1.	Living Bridge		
2.	Leaders of Dialogue		
3.	Polish-Israeli Youth Exchange		

What kind of modifications could be made to better implement the contact hypothesis within the presented programs?

If you wished to organize a similar project aimed at establishing cooperation and dialog with Israeli peers for your local community, what topics and places would you include into the program?

Discuss:

- Who would be the target audience?
- Where the project should take place?
- What kind of the activities will be organized?
- Which topics should be included and in what order?
- Are there any important places that should be visited by the participants?
