Thursday 16 October			Affiliation	Talk Title
9:00	0:30	Welcome Coffee	Amilation	Talk Title
9:30	0:40	Session 4: Elemental Abundances in Planet Formation Invited speaker: Diego Turrini Session Moderator: Giovanna Tinetti	INAF, Italy	Genetic links and compositional connections between stars, their circumstellar disks and their planets
10:10	0:15	Bertram Bitsch	University College Cork	The limits of planetesimal formation at low metallicity
10:25	0:15	Daisy Turner	University of Birmingham	Investigating Star-Planet Compositional Ties for Systems with Host Stars of Varying Composition
10:40	0:15	Giulia Ricciardi	European Southern Observatory (ESO)	Compact or large? CO observations of the faintest planet-forming disks.
10:55	0:15	Heather Johnston	University of Exeter	The rise and fall of the giant planet occurrence rate
11:10	0:20	Coffee break		
11:30	0:15	Jason Ran	University College London	Bayesian constraints on planet formation models with population synthesis and simulation based inference
11:45	0:15	Nidhi Rohit Bangera	Institut für Weltraumforschung	Unpacking Disequilibrium Chemistry in Exoplanet Atmospheres: From C/O constraints to Sulphur Photochemistry
12:00	0:15	Anna Thomas	University College London	Population synthesis to investigate the effect of volatile to refractory sulfur conversion on the production of hot and cold gas giants
12:15	0:15	Sébastien Paine	Queen Mary University of London	Photoevaporated Dust Disc Models and Synthetic Observations
12:30	0:15	Luke Keyte	Queen Mary University of London	The Chemical Composition of Externally Irradiated Disks
12:45	0:15	Free Slot		
13:00	1:00	LUNCH		
14:00	0:40	Session 5: Stellar Abundances & Planet Composition Invited speaker: Vardan Adibekyan Session Moderator: Luca Fossati	IA, Portugal	From Stellar Atmospheres to Planetary Interiors
14:40	0:15	Yoshi Eschen	University of Warwick	Chemical Fingerprints: Decoding Stellar Abundance Influence on Planetary Composition
14:55	0:15	Maria Tsantaki	Osservatorio Astrofisico di Arcetri - INAF	The exoplanet population in the Galactic context from the Ariel Mission Candidate Sample
15:10	0:15			Terrestrial Exoplanet Internal Structure Constraints on Planet
		Kevin Schlaufman	Johns Hopkins University	Formation Enabled by Comprehensive Host Star Characterization
15:25	0:15	Kevin Schlaufman Alexandra Lehtmets	Johns Hopkins University Tartu Observatory, University of Tartu	
15:25 15:40	0:15		Tartu Observatory, University of	Formation Enabled by Comprehensive Host Star Characterization Stellar Abundance Anomalies in A–F Type Stars and the Role of
15:40	0:20	Alexandra Lehtmets	Tartu Observatory, University of	Formation Enabled by Comprehensive Host Star Characterization Stellar Abundance Anomalies in A–F Type Stars and the Role of
15:40 16:00	0:20	Alexandra Lehtmets Coffee break	Tartu Observatory, University of Tartu INAF, Istituto di Radioastronomia, Bologna	Formation Enabled by Comprehensive Host Star Characterization Stellar Abundance Anomalies in A–F Type Stars and the Role of Planetary Contamination 300 disks imaged, and counting
15:40 16:00 16:15	0:20 0:15 0:15	Alexandra Lehtmets Coffee break Subsession on Disks	Tartu Observatory, University of Tartu INAF, Istituto di Radioastronomia, Bologna European Southern Observatory (ESO)	Formation Enabled by Comprehensive Host Star Characterization Stellar Abundance Anomalies in A–F Type Stars and the Role of Planetary Contamination
15:40 16:00 16:15 16:30	0:20 0:15 0:15	Alexandra Lehtmets Coffee break Subsession on Disks Antonio Garufi Karina Mauco Mari-Liis Aru	Tartu Observatory, University of Tartu INAF, Istituto di Radioastronomia, Bologna European Southern Observatory	Formation Enabled by Comprehensive Host Star Characterization Stellar Abundance Anomalies in A–F Type Stars and the Role of Planetary Contamination 300 disks imaged, and counting Characterization of protoplanetary disks near and a far: a
15:40 16:00 16:15 16:30 16:45	0:20 0:15 0:15 0:15	Alexandra Lehtmets Coffee break Subsession on Disks Antonio Garufi Karina Mauco	Tartu Observatory, University of Tartu INAF, Istituto di Radioastronomia, Bologna European Southern Observatory (ESO) European Southern Observatory (ESO) University of Copenhagen	Formation Enabled by Comprehensive Host Star Characterization Stellar Abundance Anomalies in A–F Type Stars and the Role of Planetary Contamination 300 disks imaged, and counting Characterization of protoplanetary disks near and a far: a complementary perspective
15:40 16:00 16:15 16:30 16:45 17:00	0:20 0:15 0:15 0:15 0:15	Alexandra Lehtmets Coffee break Subsession on Disks Antonio Garufi Karina Mauco Mari-Liis Aru	Tartu Observatory, University of Tartu INAF, Istituto di Radioastronomia, Bologna European Southern Observatory (ESO) European Southern Observatory (ESO)	Formation Enabled by Comprehensive Host Star Characterization Stellar Abundance Anomalies in A–F Type Stars and the Role of Planetary Contamination 300 disks imaged, and counting Characterization of protoplanetary disks near and a far: a complementary perspective Studying the effect of the environment on disk evolution with MUSE Hydrodynamical Simulations of Planet-Disk Interactions in PDS 70 Exploration of the inner region of the system HD 142527
